Protractor
end to end testing for Angular

View on GitHub

Follow @ProtractorTest

Protractor is an end-to-end test framework for Angular and AngularJS applications. Protractor runs tests against your application running in a real browser, interacting with it as a user would.

Test Like a User

Protractor is built on top of WebDriverJS, which uses native events and browser-specific drivers to interact with your

For Angular Apps

Protractor supports Angular-specific locator strategies, which allows you to test Angular-specific elements without any setup effort.

Automatic Waiting

You no longer need to add waits and sleeps to your test. Protractor can automatically execute the next step in your test the moment the

KARMA

" On the *AngularJS* team, we rely on testing and we always seek better tools to make our life easier. That's why we created Karma - a test runner that fits all our needs.
